

### **Damian Eiberman**

D.N.I. 31.526.246 - Argentinian – 40 years old

Birthdate: 19/04/1985

Vidal 1926 8°22, C1428CSD - Buenos Aires

Mobile: 1155972413

eMail: damieiber@gmail.com

### **Education:**

- Senior Technician in Sports Journalism. Tea y Deporte. Graduation: 2008.
- Python for non-programmers. Educación IT. Identification of the fundamental concepts of programming. Conception and implementation of algorithms. Writing code in Python. Working with the terminal or on the command line. Variables's creation and execution of arithmetic and logical operations. Flow direction of a program. Data storage according to the most appropriate structure. Function design. Console and desktop application development.
- Python for Data Analysis. Educación IT. Study of Anaconda's environment with it's tools (Numpy, Pandas and Matplotlib). Management of Python applied in Data Science. Own generation, analysis and formatting of Databases.
- Data Science. DigitalHouse. Machine learning models and Python libraries to extract, process and analyze large amounts of data. The program includes a module on inferential statistics and cleaning and handling practices. Efficient programming in Python, Expert use of databases and SQL language, Mastery in statistics and applied mathematics, and Skill in data analysis and visualization.

### **Certifications**

- AWS Certified AI Practitioner. Validation Number: 08e0463a0ed412cbf015e6082a8ea89

### **Tools/Technologies**

- Python
- Jupyter, Numpy, Pandas y Matplotlib
- Data visualization and analysis's tools (QlikView, QlikSense, PowerBI, Tableau, Google Looker)
- HTML/CSS
- Javascript, Typescript
- React JS – Node JS – Next JS
- Excel (Advanced)
- SQL (Intermediate)
- Salesforce
- Google Analytics

### **Relevant Work Experience:**

06/2021 – Actual

Full-Stack Developer at Global Task. HTML/CSS, React JS, JavaScript, TypeScript, Node JS, Databases, C#, .Net. Solving algorithms with programming, Agile Teamwork Methodology. Fulfilling client's expectations applying my knowledge in ReactJS, Netcore & SQL. Design and assess proof-of-concept prototype applications to demonstrate their purposes. Collaboration with members of the development team to identify, fix, and eliminate software bugs. Responsible for the development of a new responsive and modern design for a website. This included integrating the information from the APIs to the front end to use this data according to the client's needs, developing react components and views from scratch, maintaining a clean and scalable code, writing tests, and developing a backend service integration to each component/screen. Stack: HTML, CSS, JavaScript, Typescript, React JS, Next JS, MaterialUI, ANT Design, Styled Component, ESLint, Redux, React-redux, Jest-Enzyme, Sass, Less. Responsible for the development of an administrative hub for APIs to be integrated with e-commerce. This included integrating the information from

de APIs to the front end to use this data according to the client's needs, developing react components and views from scratch, maintaining a clean and scalable code, writing tests, and developing a backend service integration to each component/screen. Stack: HTML, CSS, Javascript, Typescript, React JS, Next JS, MaterialUI, ANT Design, Styled Component, ESLint, Redux, Reactredux, Jest-Enzyme, Sass, Less. Responsible for the development of an Accommodation and Organizations module for a web application of a company related to the Agro sector in the United States. This includes creating organizations to have an impact on both the database and Okta, generating them as applications on the platform to automatically result in apps/websites for the use of each organization. The code had to be developed under strict quality control according to client standards. Stack: C#, .NET, Okta, Ngrok.

Backend development in .NET with C# within the Fintech sector focuses on designing and implementing scalable service architectures for digital payment solutions. This work involves managing transactional logic, including payment processing and asynchronous notification management via webhooks. A key aspect of this role is the integration with external platforms and the orchestration of secure data flows, notably through the development of a proprietary payment gateway that centralizes communication with various payment processors.

08/2024 – 07/2025	Full-stack developer. Panda Idx. Front and back-end development. Created various features for the application's CRM section, including: data analysis dashboards with direct database processing and front-end graphics and reports. Created the platform's native email module and implemented it for subscribers to use both individual emails from the CRM itself and email marketing tools.
07/2017 – 06/2021	Data analysis, Commercial Intelligence department at Experta Seguros. Control Panel's generation, updating and development for reports and management reports (Google Data Studio, QlikView, QlikSense, Excel) Data collection and analysis. Statistical coordination of the Commercial Department Salesforce Project Ambassador.
9/2014 – 12/2017	Founder/Director de ADN River ( <a href="http://www.adnriver.com">www.adnriver.com</a> ). Website dedicated to daily news coverage of River Plate. Web design, multimedia management, content writing and editing, coordination of the editors and journalists's group (personnel in charge: 17). Special envoy to Japan for the coverage of the 2015 Club World Cup.
2/2014 – 06/2017	Coordinator, Journalist at Revista 1986. <a href="http://www.revista1986.com.ar">www.revista1986.com.ar</a> Magazine (10,000 copies of circulation and national distribution) about River Plate and the history of the club under the premise of bringing to the fans a new journalistic language. General production, conducting interviews and photographic productions, informative articles, opinion articles, analysis and research. Special envoy to Japan for the coverage of the 2015 Club World Cup.
